# DOCUMENT FINDINGS

The investigation into the murder case in SQL City on January 15, 2018, led to compelling findings and insights derived from SQL queries and database analysis. Here are the key details and insights that solidified the conclusions:

## Key Findings:

### 1. Witnesses' Testimonies:

**Annabel (ID: 16371):** Witnessed the murder, identified the killer as a male gym member who checked in on January 9, 2018, with a gold membership.

**Morty Schapiro (ID: 14887):** Provided details about the murder weapon (gun), partial membership number ('48Z'), and license plate ('H42W') of the killer.

### 2. Gym Member Investigation:

**Gold Members on January 9, 2018:** Identified Joe Germuska and Jeremy Bowers as gold members checking in on the critical date.

### 3. License Plate Confirmation:

**Jeremy Bowers:** Confirmed as the killer; his license plate ('H42W') matched the description provided by Morty.

### 4. Jeremy's Revelation:

- Jeremy Bowers: Identified his boss, Miranda Priestly, as the mastermind behind the crime.
- Female, height between 65" and 67", with red hair, drives a Tesla Model S.
- Attended the SQL Symphony Concert three times in December 2017.

## Insights and Conclusions:

**Killer Identification:** Jeremy Bowers' confirmation as the killer stemmed from witness testimonies and the matching license plate.

**Mastermind Identification:** Jeremy's disclosure regarding Miranda Priestly aligned perfectly with the described characteristics and event attendance, strongly suggesting her role as the mastermind.

**Accomplices and Involvement :** While Jeremy is identified as the killer, further investigation is recommended to unveil potential accomplices or the extent of Miranda Priestly's involvement in orchestrating the crime.

## Implications and Further Steps:

**Legal Action:** Issue an arrest warrant for Jeremy Bowers based on the evidence linking him to the murder.

**Deepening the Investigation:** Probe into Miranda Priestly's involvement and explore connections to uncover potential accomplices or additional evidence to strengthen the case.

## Final Note:

The SQL investigation allowed for the consolidation of witness statements, membership records, and personal information, leading to the identification of the murderer and the revelation of the mastermind orchestrating the crime. Further steps involve the apprehension of Jeremy Bowers and the deepening investigation into Miranda Priestly's role, aiming to secure justice and uncover the full scope of those involved in this crime.
